

SPL-2 Final Project

User Manual Report Format

Cover Page

The cover page should contain:

Project Title

SPL-2 Final Project User Manual

Submitted By:

- Student Name
- Student ID
- Student Name
- Student ID
- Student Name
- Student ID

Supervised By:

Supervisor's Name

Designation

Department/Institute

Department/Institute Name

University Name

Submission Date

1. Project Overview

Provide a brief description of the project, including:

- Purpose of the project
- Main objectives
- Target users
- Major functions of the system

The description should be concise and written from the user's perspective.

2. System Requirements

2.1 Hardware Requirements

Mention the minimum or recommended hardware needed to run the system.

Example:

- Processor
- RAM
- Storage
- Smartphone/Computer requirements
- Internet connection, if required

2.2 Software Requirements

Mention all required software and platforms.

Example:

- Operating System
- Web Browser
- Programming runtime, if applicable
- Mobile operating system, if applicable
- Required software/packages

3. Installation and Setup

Describe how a user can install, configure, or access the project.

Include step-by-step instructions such as:

1. Download or access the application.
2. Install the required software.
3. Configure necessary settings.
4. Create an account, if required.
5. Log in to the system.
6. Start using the application.

Screenshots should be included where appropriate.

4. Getting Started

Explain how a new user can begin using the system.

Include:

- How to open the application
- Registration procedure
- Login procedure
- Home page/dashboard description
- Navigation instructions

5. User Roles

If the system contains different types of users, describe their roles and permissions.

Example:

5.1 Administrator

Explain the features available to the administrator.

5.2 Registered User

Explain the features available to a registered user.

5.3 Guest User

Explain the features available to a guest user, if applicable.

6. Functionalities and Usage Instructions

This should be the **main section of the User Manual**.

Describe each major feature separately.

For example:

6.1 User Registration

Explain how a user can register.

Steps:

1. Open the registration page.
2. Enter the required information.
3. Click the **Register** button.
4. Verify the account, if necessary.

Screenshot:

Insert an appropriate screenshot of the registration interface.

6.2 User Login

Describe the login process with steps and screenshots.

6.3 Dashboard

Explain the dashboard and its major components.

6.4 Add/Create Information

Explain how users can add or create records/items.

6.5 View/Search Information

Explain how users can view or search for information.

6.6 Update/Edit Information

Explain how users can edit existing information.

6.7 Delete Information

Explain how users can delete information, if applicable.

6.8 Additional Features

Describe all other important project-specific functionalities individually.

7. Input and Output Description

Briefly describe the important inputs and outputs of the system.

For each major function, mention:

- Input required from the user
- Processing/action performed

- Expected output/result

8. Error Messages and Troubleshooting

Mention common problems that users may encounter and their solutions.

Problem	Possible Reason	Solution
Unable to log in	Incorrect username/password	Check credentials and try again
Page not loading	Internet connection problem	Check the internet connection
Invalid input	Incorrect data format	Enter data in the required format
Application not starting	Required software is missing	Install the necessary software

9. Frequently Asked Questions (FAQ)

Provide answers to common questions related to the project.

Example:

Q1. How can I create an account?

Answer: Follow the registration procedure described in Section 6.1.

Q2. What should I do if I forget my password?

Answer: Use the "Forgot Password" option available on the login page.

Add other questions relevant to the project.

10. Logout and Exit Procedure

Explain how users can safely log out of or exit the application.

11. Limitations and Precautions

Mention any important limitations or precautions users should know while operating the system.

12. Contact / Support Information

Mention how users can obtain technical support, if applicable.

Appendix

Additional screenshots, diagrams, sample outputs, or other relevant information may be included here.

Supervisor Approval

Project Title: _____

Group Members:

1. _____ ID: _____

2. _____ ID: _____

3. _____ ID: _____

4. _____ ID: _____

I have reviewed the **User Manual Report** of the above-mentioned SPL-2 project.

Supervisor's Name: _____

Signature: _____

Date: _____

Important: The report must contain the supervisor's signature. Without the supervisor's signature, the group will not be allowed to participate in the SPL-2 Final Presentation.
